

## THE EVERYPLUG ADVANTAGE

- ✓ Hard-wired, secure connection all over your home, condo or apartment.
- ✓ It's everywhere! (*not like phone & cable...*)
- ✓ Never trip on long cables again.
- ✓ Internet, telephone, TV, video games.
- ✓ Instant Ethernet or USB connection.
- ✓ As easy as plugging in a toaster.
- ✓ Take it with you anywhere there's a power outlet.
- ✓ Share with boarder\$ and tenant\$.

*"Call me today and electrify your internet"*

Wouldn't it be nice?

Plug into your  
**Broadband  
Internet**  
over **Power  
Lines!!!**

**Call 792-7966**

[www.EveryPlug.com](http://www.EveryPlug.com)

**"Internet from every plug!"**

**705-792-7966**

[info@everyplug.com](mailto:info@everyplug.com)

## YOUR ELECTRICAL OUTLETS ARE YOUR NETWORK!!!

You already have copper data cabling — it's the existing electrical system!

### • Why pay more???

Deliver high-speed internet to every electrical outlet in your home with power line communications (PLC) technology.

- Plug into a port on your router and plug into a power outlet.
- Plug into any other power outlet and connect to the internet.

**Ethernet TCP/IP** turns into **PLC signals** that are then broadcast at up to **200Mbps** throughout the electrical wiring in your home.

Use EveryPlug's adapters where you want **internet access**.

Unplug and plug back in somewhere else.  
**No drilling holes or rewiring!**

## EVERYPLUG IS FAST, SECURE, COMPATIBLE!!!

- Our system of power line network distribution turns your existing wiring into a high-speed, hard-wired, completely scalable network infrastructure!!!

### It's like plugging in a toaster!

- **Need a network connection???**
  - Installation is **quick and easy** to distribute internet through your whole house in **no time** at all.
  - EveryPlug's adapters use **DES/3DES encryption, VLAN capability, and prioritization** to ensure **privacy and reliability**.

**Try one of these!!!**  
(Adding another network connection is like screwing in a light bulb!!!)

## EVERYPLUG FITS RIGHT IN

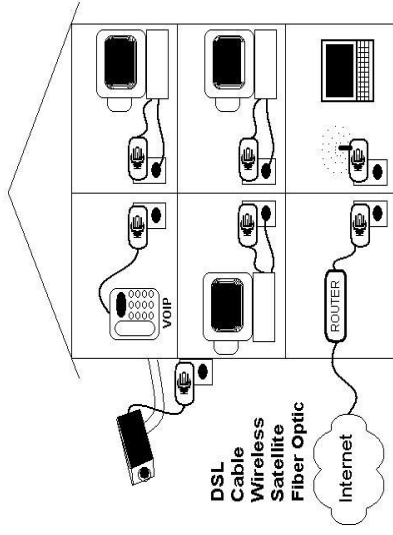

- **Compatible with cable, DSL, fiber optic, wireless, satellite, WiFi or WiMax!**
- **Internet, Internet telephone (VOIP), Virtual Private Networking (VPN), Internet television (IPTV), audio/video feeds, USB cameras, wireless hotspots, LAN extensions, and more.**

- Enjoy flawless **multiplayer gaming**, high quality **video/audio streaming**. Our products, based on world-class **DS2** technology, use sophisticated error correction (**OFDM/CSMA/CARP**), **802.1Q VLAN** tagging, and **802.1P** priority tagging.

## EVERYPLUG IS EASY!!!

The **EveryPlug powerline adapters** offer a **convenient** way to create a **network** through electrical **wiring**.

**Plug** into a power **outlet** and instantly **share Internet**, documents, **mp3s, HDTV, pictures, printers and faxes**.

**Broadband internet** is brought into the building and distributed to **electrical outlets** at up to **200Mbps!!!**

Any device that uses **Ethernet** or **USB** can now communicate with each other with **no new cabling** and **no security risks** and **no wireless dead-zones**.
